There is an uninterruptible power supply in Copenhagen

Overview

What should I do if I experience a power outage in Denmark?

The power supply in Denmark is very stable, and if power outages occur, it is often only a minor local interruption. If you experience a power outage, you should check whether it is only in your household, or if the entire property or neighbourhood is affected. If the outage is affecting the entire neighbourhood, contact your grid company.

Do all electricity suppliers in Denmark have a supply obligation?

All electricity suppliers in Denmark have a supply obligation, which is regulated in section 6b (6) of act no. 119 of 6 February 2020, the Electricity Supply Act.

What is an uninterruptible power supply (UPS)?

An Uninterruptible Power Supply (UPS) is a backup power system that ensures devices and equipment continue functioning during power interruptions. When the main power source (usually the electric grid) experiences a failure, the UPS immediately switches to its backup power, allowing systems to continue operating without disruption.

How do I complain about electricity supply in Denmark?

You can use the Danish Energy Supplies Complaint Board's complaints guide. You can find the complaint guide via the complaint board's website. Please note that the information is only available in Danish. There are different acts and executive orders that apply to electricity supply and consumption in Denmark.
