To make money from solar or energy storage

Overview

How can you make money from solar power?

You can make money from solar power by selling excess electricity back to the grid through net metering, earning solar renewable energy certificates (SRECs), leasing your rooftop to solar companies, and investing in or developing solar farms. These strategies help you generate income while promoting renewable energy use.

How can I make money from solar panels on my roof?

The easiest way to make money from solar panels on your roof is through net metering. Utility users that produce solar power can feed part of the excess energy back into the grid thanks to net metering. With this billing strategy, solar clients receive credits against their electricity usage, which lowers their monthly expenses.

How much money can you make with solar power?

The amount of money you can make with solar power depends on several factors, including the size of your solar installation, local electricity rates, government incentives, and the specific method you choose.

How much money can you save by installing solar panels?

According to the U.S. Department of Energy, homeowners can save up to \$30,000 over 20 years by installing solar panels and participating in net metering programs. Additionally, the market for solar renewable energy certificates (SRECs) offers an average annual income of \$300 to \$1,000 per kW of solar capacity.
