UK Peak Valley Energy Storage Project

Overview

The UK government has announced that it will allocate \$38.9 million (£28.6 million) to the Peak Cluster project—a carbon capture and storage (CCS) initiative that will tackle industrial CO₂ emissions and store them underground. How much will the UK spend on the peak cluster project?

The UK government has announced that it will allocate \$38.9 million (£28.6 million) to the Peak Cluster project—a carbon capture and storage (CCS) initiative that will tackle industrial CO₂ emissions and store them underground.

How much money does the UK's largest CO₂ storage project get?

The UK's largest CO₂ storage project receives a £28.6m boost from the National Wealth Fund.

Why should you invest in peak cluster?

“Peak Cluster, as the largest cement CCS project globally, is a hugely compelling opportunity to drive this sector towards sustainability. We are delighted to have the opportunity to invest in Peak Cluster alongside the National Wealth Fund.”.

What is the peak cluster project?

The Peak Cluster project aims to cut annual carbon emissions from its partners by three million tonnes a year from 2032 - a quarter of annual CO₂ output for the area - by capturing carbon dioxide from the plants and transporting it via pipeline to be permanently locked away under the East Irish Sea in disused gas fields run by Morecambe Net Zero.
