

**BLINK SOLAR**

# **UPS uninterruptible power supply to the plc cabinet**

## Overview

---

- Meet code requirements to allow proper shutdown of the UPS when control panel is open and closed and provide for remote monitoring and control of UPS.

What is an industrial uninterruptible power supply?

The 1609 family of Industrial Uninterruptible Power Supplies is designed for industrial applications – with features required for remote control and operation inside of industrial control panels. • Flexibility to meet most installation scenarios, included control panels typically used in production environments.

Can a UPS system be used for PLC power backup?

Control System Using UPS Systems for PLC Power Backup Figure 1 shown on page 2 shows a typical wiring circuit when using a UPS system in the power circuit for the following purposes: Feeding the power supply of the PLC Feeding the power supply for the control circuit(s) are adopted in an application depends on the requirements of the application and also.

Does UPS improve availability of PLC system?

UPS system on the availability of the PLC system. The UPS system can largely improve the availability of the PLC in case of power failure. Scenario #2 described above is certainly the best solution in terms of availability of the PLC system since it allows to continue production.

How do I Choose an uninterruptible power supply for DC applications?

Our uninterruptible power supplies for DC applications provide reliable protection against supply interruptions. Select the appropriate DC UPS for your application. Our uninterruptible power supplies for AC applications provide a pure sine wave at the output. Select the ideal AC UPS and ensure superior system availability.

## UPS uninterruptible power supply to the plc cabinet

---

### Uninterruptible Power Supply (UPS) with PLC Control Cabinet
