Uninterruptible Power Supply for Ireland Data Center

Overview

What is an uninterruptible power supply?

An uninterruptible power supply, commonly known as "UPS Power Supply" is a device that is designed to supply power to your computers, servers and data centres in case of main power failure, electrical surge or unexpected power cut off.

Do you need an uninterruptible power supply for a data centre?

Specifying an uninterruptible power supply (UPS) for a data centre application is one of the most critical parts of the design and planning process. Whether a stand-alone or co-located data centre, clients are reliant on its constant operation. Any downtime could be catastrophic to organisations both financially and reputationally.

Where can I buy uninterruptible power supply (UPS) systems?

You're in the right place. At HuntOffice.ie, we stock a wide range of uninterruptible power supply (UPS) systems for Irish businesses, schools, and remote work setups. Whether you're protecting a single PC or your entire server rack, our solutions help prevent downtime, data loss, and costly interruptions.

Who is Kohler uninterruptible power?

Having completed over 2.6GW of power protection installations within many data centre designs, KOHLER Uninterruptible Power's clients range from enterprises running their own in-house UPS solutions, through to modular UPS systems and medium-sized colocation data centre solutions right up to large hyperscale facilities.
