**Uninterruptible power supply
13 8v**

Overview

What is a 12V uninterruptible power supply?

This is a simple and fully automatic, 12V uninterruptible power supply system for small/medium power appliances. This power supply specifically designs to drive routers and modems to provide uninterrupted internet and telephone services in areas affected by frequent power failures.

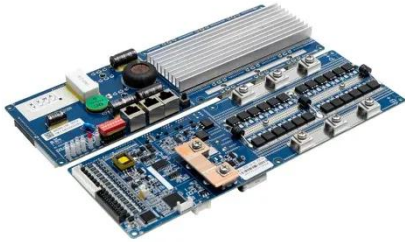

Do I need an uninterruptible power supply?

An uninterruptible power supply (UPS), which is a battery that covers the 15-20 second delay between the time when the power goes out and the generator kicks in, is necessary for the generator. When you are ready for your new generator, call Jack Lehr Heating, Cooling & Electric at (888) 454-7365 or contact us online!.
