# Uninterruptible power supply 8 hours

 **TAX FREE**    

## ENERGY STORAGE SYSTEM

**Product Model**  
HJ-ESS-215A(100KW/215KWh)  
HJ-ESS-115A(50KW 115KWh)

**Dimensions**  
1600\*1280\*2200mm  
1600\*1200\*2000mm

**Rated Battery Capacity**  
215KWH/115KWH

**Battery Cooling Method**  
Air Cooled/Liquid Cooled

## Overview

---

UPS battery backup is a key component of the uninterruptible power supply system, which ensures that in the event of a mains power failure, the ability to provide a certain period of time to the key equipment power. 8-hour UPS battery backup Specifically refers to those who can be in the absence of external power supply, continuous power supply for 8 hours of standby batteries. How do uninterruptible power supplies work?

Uninterruptible power supplies (UPS) automatically test their batteries regularly, typically every 24 hours, by placing a load on the battery set and monitoring the discharge performance. This is how they work.

How long do uninterruptible power supplies last?

Most uninterruptible power supplies have a lifespan of around 3-5 years (which the warranty will normally cover) and after that they're toast. This lifespan can be even shorter if you use the battery backup frequently. You can buy replacement batteries direct from the manufacturer and replace them yourself, extending the lifespan of the product.

What is a good uninterruptible power supply (UPS)?

A good UPS for gaming computers or high-power computers with two monitors would have a 500-1000 VA capacity. For additional peripheral units, consider UPSs with a capacity higher than 1000 VA. Another important characteristic is UPS wireless productivity.

What does incoming utility power do?

During normal operation, incoming utility power keeps the replaceable internal battery fully charged, so backup power will always be available. Connects your equipment to 8 protected C13 outlets all eight C13 outlets provide both battery backup and surge protection for your computer, monitor and other crucial components.
