Uninterruptible power supply equipment for Freetown Hospital

Overview

What is a medical-grade uninterruptible power supply (UPS) system?

Our medical-grade uninterruptible power supply (UPS) system secures seamless backup power and protects your equipment from damage. These solutions will instantly switch your system to a backup power supply with no lapses, preventing dire consequences during medical procedures.

What is an uninterruptible power supply?

Uninterrupted power supplies have two primary roles — to provide backup power as quickly as possible and to protect the equipment from potential quality issues caused by sudden outages. Our uninterruptible power supply equipment efficiently does both to ensure you can carry on with your tasks without delay.

Why do hospitals have uninterruptible power supplies?

Many hospitals have uninterruptible power supplies dedicated to specific testing bays to ensure a smooth and constant supply of utility power. Navigate outages safely and effectively during emergency situations.

What is a Cyberpower medical grade UPS system?

CyberPower Medical Grade UPS systems have been designed to power and protect sensitive equipment in hospitals and healthcare facilities. Each medical UPS is UL 60601-1 tested to provide standby power in patient-care settings and comes with hospital-grade plugs and hospital-grade outlets, and a built-in isolation transformer.
