Use of energy storage batteries in Cyprus

Overview

Does Cyprus have a battery energy storage system?

Cyprus's electricity regulator has approved plans to install 400MWh of battery energy storage system (BESS) projects in the Mediterranean island country. Cyprus Energy Regulatory Authority (CERA) announced the approval earlier this week (18 June) of three projects which will be owned and operated by the Cyprus Transmission System Operator (TSOC).

Will Cyprus install 400MWh battery energy storage system?

Image: Cyprus government / MECI. Cyprus's electricity regulator has approved plans to install 400MWh of battery energy storage system (BESS) projects in the Mediterranean island country.

How is Cyprus developing pumped hydro energy storage capacity?

The country is also seeking to develop pumped hydro energy storage (PHES) capacity with technical assistance from the European Commission (EC) and is formulating a National Hydrogen Strategy. Cyprus's electricity regulator has approved plans to install 400MWh of battery energy storage system (BESS) projects.

What type of energy is used in Cyprus?

Renewable energy here is the sum of hydropower, wind, solar, geothermal, modern biomass and wave and tidal energy. Traditional biomass – the burning of charcoal, crop waste, and other organic matter – is not included. This can be an important energy source in lower-income settings. Cyprus: How much of the country's energy comes from nuclear power?

Battery Storage Systems for Solar in Cyprus: Complete 2025

...

Battery storage eliminates this costly gap, storing your excess midday energy for nighttime use. With current government grants covering up to EUR5,000 of installation costs, ...

New energy programme supports batteries and solar power

Implementing a nationwide battery storage plan is not easy. EIB Advisory staff helped the ministry design the energy storage plan with new evaluation and financing tools ...

Cyprus approves 120MW battery storage system

The energy regulator has approved a significant battery storage system totalling 120MW across three locations to enhance grid stability and security, marking a crucial step for ...

New Legislation To Revolutionize Energy Storage In Cyprus

After much anticipation, the Cyprus Parliament unanimously passed a pivotal law enabling the storage of electrical energy. This significant move, driven by persistent efforts ...

Cyprus Launches First Major Battery Energy Storage System

Cyprus has commissioned its first major battery energy storage system (BESS). Discover the 50 MW project's partners, technical details, and impact on grid stability and ...

Battery Energy Storage System in Cyprus 2025 - What You ...

A commercial battery energy storage system in Cyprus can store solar energy, reduce grid reliance, support net billing, and even protect against blackouts. In this ...
