## Overview

---

Can PV cells be integrated into Unmanned Aerial Vehicles (UAVs)?

An international research team has identified parameters to integrate PV cells into unmanned aerial vehicles (UAVs). Image: Nehemia Gershuni-Aylho, Wikimedia Commons Researchers from Spain and Ecuador have developed an optimization method to integrate PV cells and batteries into UAVs.

What are solar-powered unmanned aerial vehicles (UAVs)?

In the field of aviation, solar-powered unmanned aerial vehicles (UAVs) have attracted attention owing to their high-altitude cruise and the availability of renewable energy , .

Can photovoltaic cells be mounted on UAV surfaces?

Mounting photovoltaic cells on UAV surfaces is considered the most simple and effective technique to harvest solar energy (Fig. 5 a).

Are fuel cells a viable option for lightweight UAVs?

Fuel cells, particularly proton exchange membranes, demonstrate high energy density, enabling long flight durations for lightweight UAVs, yet face challenges such as slow response and hydrogen storage limitations.
