

BLINK SOLAR

Vienna wind solar and storage integrated manufacturer

DETAILS AND PACKAGING

1 USER MANUAL PDF

2 RJ45 Cable For RS485/CAN

3 Battery in Parallel Cables

4 RJ45 TO USB Monitor Cable

5 M8 Terminal*4

Overview

Which wind farms are being built in Austria?

The company has agreed to buy the operational 52.2MW Mönchhof wind farm in Burgenland; the 61.8MW Loidesthal II wind project, which is currently under construction in Lower Austria; and the 16.8MW Hohenau-Ringelsdorf solar project, which is also under construction in Lower Austria.

Why is austriaenergy a leader in photovoltaic & wind power?

Since 2013 also in Chile, where photovoltaic and wind power plants with an output of close to 1,000 MW have been developed and the respective technology integrated, in part put into operation and the remaining once in construction or financing. This makes AustriaEnergy being one of the leaders and pioneers in these areas.

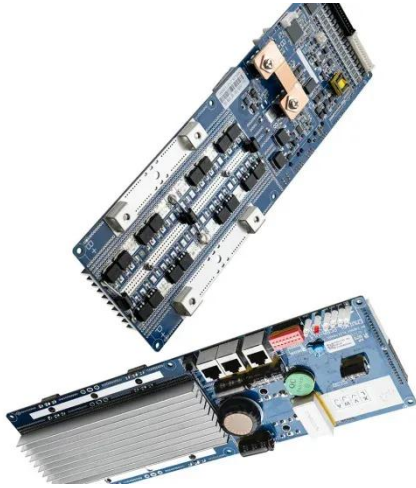

What does austriaenergy do?

Working in harmony with nature and generating competitively priced renewable energy; we are entering the next stage of the energy transition by producing green hydrogen (H₂) and green ammonia (NH₃). AustriaEnergy has significant experience in the site development and technology integration of renewable energy projects.

How will a wind farm affect the energy industry?

Michael Strebl and Karl Gruber, managing directors at Wien Energie, issued a statement that said: "With the two wind farms, we will increase our annual wind power production by over 50% in the next two years. In addition, there is our Ebreichsdorf wind farm, which is currently under construction.
