Vientiane Mobile Power Station Generator Company

Overview

Where is the Nam Ngiep 1 Hydropower Plant located?

The Nam Ngiep 1 hydropower plant is a large-scale dam type power station located on the Nam Ngiep River, a tributary of the Mekong River that flows through the border between Lao People's Democratic Republic (Laos) and the Kingdom of Thailand (Thailand). The Nam Ngiep 1 project has two power stations with a total capacity of approximately 290 MW.

How many power stations does Nam Ngiep 1 have?

The Nam Ngiep 1 project has two power stations with a total capacity of approximately 290 MW. The Main Power Station is equipped with a total of approximately 270MW power units and a large-scale dam which is 167m high and 530m long in its dam crest. The Main Dam is equivalent to Kurobe Dam of the Kansai Electric Power Company in terms of its size.

Is Nam Ngiep 1 a re-regulation power station?

The Main Dam is equivalent to Kurobe Dam of the Kansai Electric Power Company in terms of its size. The Re-regulation Power Station is equipped with an approximately 20MW power unit. The Nam Ngiep 1 is a BOT (*) project which sells its generated electricity to Thailand and Laos for 27 years.

How many power units does Kansai power station have?

The Main Power Station is equipped with a total of approximately 270MW power units and a large-scale dam which is 167m high and 530m long in its dam crest. The Main Dam is equivalent to Kurobe Dam of the Kansai Electric Power Company in terms of its size. The Re-regulation Power Station is equipped with an approximately 20MW power unit.
