Vietnam new energy storage foreign trade orders

Overview

Does Vietnam have new feed-in tariffs for solar power?

April 2025 | Southeast Asia Impact Alliance Vietnam is taking another step toward modernizing its renewable energy sector by unveiling updated feed-in tariffs (FiTs) for solar power, with a notable emphasis on encouraging battery energy storage systems (BESS).

Could Vietnam replace fixed feed-in tariffs with standardized auctions?

As global costs for solar, wind, and battery storage systems fall, Vietnam could replace fixed feed-in tariffs (FiTs) with standardized competitive auctions to procure clean energy at the lowest cost.

Does Vietnam have a long-term Power Purchase Agreement (PPA)?

Power producers will continue to sign long-term power purchase agreements (PPAs) with Vietnam Electricity (EVN), the state utility, under existing contractual frameworks. Vietnam's FiT scheme has been instrumental in driving clean energy development since its introduction.

What is Vietnam doing with feed-in tariffs?

Beyond the feed-in tariffs (FiTs), Vietnam is also offering policy incentives to catalyze investments in innovative energy solutions. According to Decree 58/2025/ND-CP, projects involving 100% green hydrogen or green ammonia can access preferential treatment, including:
