# **Waduz Solar Container Two-Way Charging Purchase Link**

## Overview

---

What is two-way charging?

Two-way charging is a two-way solar tariff for residential and business solar customers. It's designed to: encourage customers to export excess energy generated at times when it's needed the most. Why do we need two-way charging?

.

Can a containerized Solar System be installed off-grid?

Off-Grid Installer have the answer with a containerized solar system from 3 kw up wards. Systems are fitted in new fully fitted containers either 20 or 40 foot depending on the size required.

How do we manage exporting solar energy back to the grid?

This means the way we manage exporting excess solar energy back to the grid needs to change. In 2021, the Australian Energy Market Commission (AEMC) identified we need to support the integration of rooftop solar more efficiently into the electricity grid. One solution is the introduction of two-way charging.

What is a solar PV container?

The Solar PV Container is a containerized solar power solution. It has been designed with the aim of combining solar electricity production and mobility to provide this electricity everywhere around the world.
