Overview

What types of containers are used for intermodal transport?

Rail transport is a fast, safe, and reliable way to move large goods and is more environmentally friendly than sea or air transport. This article covers the types of containers used for intermodal transport and how to purchase them at the best price. 1. Types of Railway Containers Ideal for dry cargo like paper, grain, clothing, electronics, etc.

What are the different types of Railway Containers?

1. Types of Railway Containers Ideal for dry cargo like paper, grain, clothing, electronics, etc. Largest containers on the market, perfect for transporting large cargo such as vehicles and machinery. Feature no fixed roof, suitable for tall or irregularly shaped goods. Covered with a tarpaulin during transport to protect from weather.

What is a foldable steel storage container?

Foldable steel storage containers come in three lengths, each with a standard width of 2.1m. The smallest size is compact enough to be used as a garden shed, even in a small back garden in the most restricted of spaces. These products are also modular, so you can expand on storage space at any time by joining three units together.

What is a double steel storage container?

Double steel doors with dual locks are a deterrent to unauthorised access, and the steel structure of the container body makes them wind and waterproof and very resilient to damage. For more detailed technical details on foldable steel storage containers see our [Containerstore information page](#).
