# **Western European solar container lithium battery factory**

## Overview

---

How many EV battery factories are there in Europe?

Due to the increasing demand for electric vehicles (EVs), it is expected that nearly 250 battery factories will be installed in the European continent in the next ten years, as reported by Buck Consultants International.

Can Europe build a world-leading battery industry?

T&E calls on clear foreign investment rules and a comprehensive European strategy for battery supply chains. Europe's ambition to build a world-leading battery industry is facing many headwinds. As local plans falter, over 90% electric car and storage batteries are produced by South Korean and Chinese companies in the EU.

How many battery factories will Europe open by 2033?

Europe will open 250 battery factories by 2033. What are the confirmed projects?

Plans have already been revealed in France, Germany, Italy, Norway, Spain, and the United Kingdom. In this way, the region aims to compete with China, which achieved a battery production almost ten times larger than that of Germany.

Who makes battery energy storage systems?

Continental AG Continental AG, a renowned automotive supplier, has actively developed electric vehicle batteries and battery energy storage systems (BESS). It was founded in 1871 and is headquartered in Hanover, Germany.
