What are the container generator equipment

Overview

What is a containerised generator?

Our Containerised Generators deliver robust, high-capacity power from 300–3,000 kVA in secure, weather-resistant enclosures. Designed for challenging environments and critical applications, they offer noise reduction, easy transport, and bespoke configuration to meet your site's exact needs.

Can you put a generator in a container?

Generators can be put into containers. There are a number of benefits to doing this including: Easier transportation and installation making them ideal for temporary or remote applications. They are more secure as typically they are lockable which prevents unauthorised access. Do I need to service my power system?

Put simply, yes.

What is a containerized genset?

Most containerized gensets come equipped with built-in silencers and soundproof insulation, which reduces noise to acceptable levels for urban or commercial use. Containerized gensets are often designed for “plug-and-play” operation, allowing rapid setup and start-up. This is especially useful in emergency or disaster relief situations.

What are the different types of Genset units used for reefer containers?

There are three main types of genset units used for reefer containers: clip-on gensets, under-mount gensets, and on-chassis gensets. Each type serves specific purposes based on transportation needs and logistical requirements. Clip-on gensets are portable units that attach directly to the front or chassis of the reefer container.

What are the container generator equipment

What is a Containerized Generator?

A containerized generator is a specialized type of power generation unit designed to provide reliable and portable electricity in various settings. Unlike traditional generator sets, ...
