# **What is the price of new solar modules**

## Overview

---

How much will a Tier 1 solar module cost?

Hryshko expects prices of high-quality Tier 1 solar modules to soon exceed \$0.12/W. “This means module prices will at least match production costs for the first time in months,” she highlights. “And this should happen within six months.

Will solar module prices increase in the next six months?

Solar module prices are expected to increase significantly from current levels in the next six months, according to Yana Hryshko, head of Solar Supply Chain Research for Wood Mackenzie. “Prices have to increase, as the Chinese solar manufacturing industry is going to do everything to make this happen,” she told pv magazine.

How much do solar panels cost?

Global solar panel pricing varies wildly. Manufacturing locations dramatically affect final costs. China produces the world’s cheapest solar panels at \$0.13-\$0.18/watt. Vietnam and Malaysia follow at \$0.18-\$0.22/watt. US/EU panels cost \$0.30-\$0.50/watt. Key Insight: Cheapest doesn’t mean lowest quality.

How much does a solar system cost in China?

Component Checklist: Solar systems in China offer exceptional value at 40-60% lower costs than Western markets. Quality systems start at ¥15,000 (\$2,100) with 6-8 year payback periods. This article will take you through solar system price in china: how much does it really cost, but the quality varies greatly by supplier and system type.

## What is the price of new solar modules

---

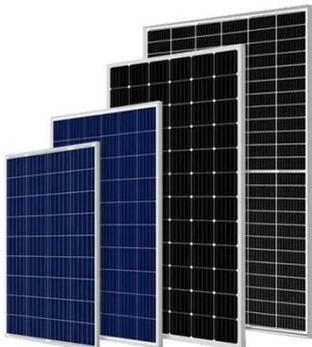

### PV Price Watch: China's module prices reach RMB0.75/W

China's latest tender results show the spot price of n-type modules increasing from RMB0.7/W to as much as RMB0.75/W.

### 'Solar module prices will soon go back to over \$0.12/W'

Hryshko expects prices of high-quality Tier 1 solar modules to soon exceed \$0.12/W. "This means module prices will at least match production costs for the first time in ...
