What to do if the inverter of the solar container communication station is hijacked

Overview

Are Chinese-made solar inverters a supply-chain vulnerability?

Leading renewable energy operators worldwide are confronting a disturbing supply-chain vulnerability: undocumented communication modules found in Chinese-made solar inverters and batteries.

Are hidden radios in Chinese-manufactured inverters a threat?

Hidden radios in Chinese-manufactured inverters expose a real supply-chain vulnerability that could undermine grid stability and corporate reputation. Maya Security specializes in operational-technology resilience assessments, uncovering undisclosed hardware risks before they become emergencies.

Why is my solar inverter NOT working?

It is very likely due to a communication issue between the Battery BMS and the Solar inverter. This post may help you solve this common problem. Quick Solution: You can try to disconnect PINs 1-6, leaving only the pins 7 and 8.

Are cellular radios soldered to inverter & battery circuit boards?

Confirmed Findings: On , Reuters reported that U.S. energy officials and third-party hardware analysts uncovered cellular radios and other comms modules directly soldered onto inverter and battery circuit boards, features absent from all publicly available specifications (Reuters, May 14 2025).
