

## BLINK SOLAR

# What you need for a home solar system

## Overview

---

What equipment do you need to go solar?

To go solar, you'll need solar panels, inverters, racking equipment, and performance monitoring equipment—at a minimum. Depending on where you live, you may also consider a solar battery. The components of a solar panel system are pretty simple.

Why do you need a solar house?

It's beneficial for the environment as well as helps you cut power bill expenses. To make it run, you will need some key components including storage systems and solar panels, which are sometimes available as complete solar house kits. Having solar panels makes smart financial sense as power gets more costly.

How do I build a solar powered home?

Build Your Solar-Powered Home! Five basic components—Solar panels, inverters, mounting systems, specialized wiring, and monitoring equipment—are needed running a house on solar power. Success depends on your ability to appropriately size your system, estimate solar availability, determine your energy demands, and get required permissions.

What is a home solar system?

A home solar system is a common way to lower energy costs and adopt sustainable living. Harnessing the sun lets you become energy-independent from power companies. You also contribute to an eco-friendly practice of lessening valuable resources used to generate electricity. This guide will dissect solar system operation.
