Where is the HJ Communications 5G base station in Denmark

Overview

Why is 4G so important in Denmark?

4G significantly increased the speed and gave us real mobile internet in Denmark. However, the amount and use of data is growing rapidly and today it is increasingly difficult for 4G to keep up. 5G makes the mobile network as fast and efficient as the broadband we know from home. With 5G, we turn the speed up and the latency down.

Which mobile network is the fastest and most error-free in Denmark?

For 10 consecutive years, the Danish Technological Institute has measured our mobile network to be the fastest and most error-free in Denmark. This is a position we aim to maintain in the future. Most recently, the Danish Technological Institute measured 5G mobile coverage at an impressive 99.7%.

Why is TDC net leading the way with nationwide 5G?

TDC NET has been connecting Danes for more than 140 years. And we will continue to do so. We are not only building today's infrastructure but also the infrastructure of the future. That is why TDC NET is leading the way with nationwide 5G. Because we want to invest in Denmark's digital future. We connect Denmark. For everyone.

What is 5G & how does it work?

5G makes the mobile network as fast and efficient as the broadband we know from home. With 5G, we turn the speed up and the latency down. It offers completely new possibilities on the mobile network.
