Overview

Does SolarEdge have a bi-directional DC EV charger?

At Intersolar Europe, SolarEdge revealed its new Bi-Directional DC EV Charger. The charger allows solar-powered V2H and V2G operations.

Should you buy a bi-directional charging station?

Only the latest models of EVs have this capability. If you have a car that can charge bi-directionally, especially if you have a dynamic energy contract, it can be very advantageous for you to purchase a bi-directional charging station. This is because a dynamic energy contract allows you to fully charge your car when the power is cheapest for you.

How do I charge my EV with solar energy?

Our solar charging software lets you charge your EV with 100% solar energy or a mix of solar and grid energy. To enable solar charging, you must combine it with one of our power meters. Once installed, you just need to set your preferred mode right from the app Wallbox and let your charger do the rest.

Can a containerized Solar System be installed off-grid?

Off-Grid Installer have the answer with a containerized solar system from 3 kw up wards. Systems are fitted in new fully fitted containers either 20 or 40 foot depending on the size required.
