# **Which portable power bank should I bring to Eastern Europe**

## Overview

---

Choosing a reliable power bank with high capacity, multiple ports like USB-C, USB-A, Lightning, and wireless charging, plus fast-charging tech such as Power Delivery or QC 3.0, is essential. What makes a power bank best for traveling to Europe?

Following are the things that make the power bank best for traveling to Europe: First, the power bank that you get should not take much time to charge a phone or any other small gadget. Fast charging allows you to get the phone recharged quicker so you can use it whenever needed. A power bank should not only be compatible with phones.

What are the power bank rules across European airlines?

By following these steps, you will gather comprehensive and reliable information about power bank rules across European airlines. Passengers can carry power banks under 100Wh on airplanes in Europe without restriction. For those between 100Wh and 160Wh, airline approval is needed.

Can power banks be used on European flights?

Battery capacity limits dictate how power banks can be used on European flights. Power banks with a capacity up to 100 watt-hours (Wh) are generally permitted in carry-on luggage. According to the EASA regulations, devices between 100 Wh and 160 Wh require prior approval from the airline.

How to choose a power bank for travel?

A power bank that is meant to be used for travelling should not be bulky or heavy. Also, its size should not be big. Carrying a huge power bank while you are on the go is a hassle on its own. It adds to the list of things that you will be worrying about during travel.
