# Which solar base station in Marseille is better

## Overview

---

What is the largest solar plant in France?

The Gabardan Solar Park is a photovoltaic power plant in France with a capacity of 67.5 megawatts (MW). It features 872,300 thin-film PV panels from First Solar, as well as a 2 MW pilot plant utilizing 11,100 solar trackers. All Largest Solar Plants Here is a list of the largest France PV stations and solar farms.

How much solar power does France have in 2015?

Solar power in France grew steadily in 2015, reaching a total photovoltaic capacity of 6.6 gigawatts by the end of the year, delivering 6.7 Terawatt hours of electricity. France in 2015 ranked eighth in the world in terms of solar PV installed capacity. During the year, around 903 megawatts of new installations were established.

How much solar power will France have in 2035?

EDF, a state-owned corporation, announced in 2018 to invest €25 billion in solar power generation and adopt green electricity prices, with the goal of "increasing 30 gigawatts of solar capacity in France between 2020 and 2035. Solar power capacity is expected to grow, with roughly 18-20 GW expected to be constructed by 2023.
