

## BLINK SOLAR

# Which solar container communication stations in Jamaica have more wind power

Resistant to -20°C-55°C high and low temperature.

## Overview

---

Will BMR energy build a wind farm in Jamaica?

It would be the first project for BMR Energy and the first private company to build a wind farm in Jamaica. Despite the government of Jamaica's interest in renewable energy, local, long-term financing was nearly impossible to attain given the weak economic situation.

Could a 36-megawatt wind turbine farm be built in Jamaica?

Bruce Levy, CEO and President, and his partner Andrew Rovito, Senior Vice President, had a vision: construct a 36-megawatt (MW) wind turbine farm, using 11 3.3 MW wind turbines, which at the time was virtually unheard of in Jamaica, where most wind turbines are at the 2 MW size.

What problems did the power sector face in Jamaica?

The power sector in Jamaica also faced critical issues: high generation costs driven by an over-reliance on imported fossil fuels and electricity theft which is driven by the high electricity prices and longstanding socioeconomic issues. Not to mention, the wind sector was relatively untested. Could a project of this scale survive?
