Overview

Could solar power be the future of energy in Congo?

Congo is one of the top five oil producers in Sub-Saharan Africa. But despite its rich energy resources, the electrification rate is low, especially in rural areas, mainly because of a lack of electricity infrastructure. But solar power could be the future as it is also said to be cheaper for households.

Why are solar-powered filtration systems being installed in the Republic of Congo?

To reduce water pollution in the Republic of Congo, solar-powered filtration systems have been installed to purify water.

Will PROPARCO invest in a mini-grid project in eastern DRC?

Building on these initial successes, the company has developed a pipeline of mini-grid projects in Eastern DRC. Proparco plans to co-invest with IFC in this opportunity, and has jointly led the ESG and Governance action plans, bringing much-needed risk capital to the round to fully finance the series B projects.
