Air Cooled/Liquid Cooled

Overview

How is electricity sold in New Zealand?

Electricity is bought and sold on the wholesale market. There are about 330 participants in New Zealand's wholesale electricity market. The wholesale market is where generators sell electricity and retailers buy electricity. Retailers then on-sell that electricity to businesses and households across New Zealand.

Why should you buy a portable power station in New Zealand?

New Zealanders love staying connected while they're out and about on holiday. Our range of portable power stations and solar-powered products ensures your devices are constantly charged on the go. Get the amps you need on-location and enjoy freedom from noisy generators. Shop for portable power solutions at Trade Tested online.

How does New Zealand's electricity market work?

In New Zealand's electricity market, the System Operator forecasts electricity demand across the country in 30-minute trading periods throughout the day. Electricity generators such as hydro dams and wind farms then offer electricity to meet that demand, plus reserve generation or "backup" power.

What is the wholesale market in New Zealand?

The wholesale market is where generators sell electricity and retailers buy electricity. Retailers then on-sell that electricity to businesses and households across New Zealand. There are about 80 generation companies, 62 retailers and 6 gentailers (generator-retailers) in New Zealand's wholesale market.

The electricity market

Wholesale Electricity Prices Are Highly Variable
Price Certainty For Our Customers
Reliable Returns For Investors
In New Zealand, wholesale market prices vary a lot depending on the balance between which power stations are available to generate, and how much electricity customers need at any one point in time. Customer demand can change a lot at different times of the day or year. For example, on cold winter evenings demand is high, but it's generally much low See more on [meridianenergy .nz](http://meridianenergy.nz)
