# **Xiaomi outdoor power solid state battery**

## Overview

---

Is Xiaomi launching a solid-state battery?

Xiaomi has disclosed a new patent marking its entry into solid-state battery development. The patent describes a layered electrode structure that improves ionic conductivity and energy density—two critical barriers to commercialising this next-generation battery technology.

Does Xiaomi have a cell-to-body battery?

Xiaomi claims its prototype features a cell-to-body design with a volume efficiency of 77.8%. It reportedly delivers a CLTC-rated range of over 745 miles and supports fast charging. Chinese tech giant Xiaomi has taken a significant step into the solid-state battery race by filing a new patent for a layered electrode design.

What does Xiaomi's new patent mean for solid-state battery development?

Chinese media reported a patent for the technology, which describes a layered electrode structure that improves ion conductivity and energy density. For Xiaomi, the new patent marks the technology company's entrance into solid-state battery development.

Will Xiaomi's electric cars have a 'solid-state' battery?

Xiaomi is developing solid-state batteries for its electric cars that enable a range of over 1,200 km, according to Chinese testing standards and a fast-charging capability of 800 km in 10 minutes. Chinese media reported a patent for the technology, which describes a layered electrode structure that improves ion conductivity and energy density.

### Home Energy Storage (Stackble system)

- Product Introduction**
- 1 Scalable from 10 kWh to 50 kWh
  - 2 Self-Consumption Optimization
  - 3 Integrated with inverter to avoid the compatibility problem
  - 4 LFP battery, safest and long cycle life
  - 5 Stackable design for easy installation
  - 6 Capable of High-Powered Emergency-Backup and Off-Grid Function
